

# Snow Melting and De-Icing System

**PROPAK® Snow Melting and De-icing System** is the ideal and practical answer for every home and business where winter access is a problem. By circulating an antifreeze solution through a network of non-corrosive plastic pipes embedded in the concrete, the hydronic heating system effortlessly and economically melts snow and ice from any concrete surface and keeps winter, not people, from your door.

## Advantages Over Other Systems Include:

- **Maximum efficiency for energy conservation and operating economy.**

PROPAK® conserves energy by using our proven modulating gas control valve. The firing rate will track the heating load using the minimum input required to melt snow or keep ice from forming. Other systems fire when the temperature drops and remain on at full input until temperature rises causing the system to cycle with light load conditions.

- **Lower initial cost, faster payback.**

Low installation costs, high operating efficiency and increased cold weather business provide a quicker return on your investment when compared to other types of snow melting systems.

- **Reliable, trouble-free performance.**

PROPAK® is a reliable, trouble free de-icing system. The polythermal tubing is non-corrosive, resists electrolysis and transmits heat as rapidly as the concrete slab can absorb it.

- **Convenient, safe and simple.**

PROPAK® works with the flip of a switch, eliminates shoveling, safeguards your health and adds to the comfort and value of your home or business.

## Specific Applications Include:

- Car washes
- Hospitals
- Sports Facilities
- Offices
- Banks
- Theaters
- Parking lots
- Driveways
- Ramps
- Runways/airports
- Retirement Villages
- Stores
- Supermarkets
- Shopping Malls
- Residential homes
- Side walks
- Stairs
- Porches

# PROPAK<sup>®</sup> By Huron Valley Sales

**PROPAK<sup>®</sup> by Huron Valley Sales** continues to be a leader in Snow Melting and De-icing Systems by offering:

- **Experience** - over 10,000 systems installed since 1964
- **Flexible System Design** - specifically engineered for your particular application
- **Single Source Responsibility** - by providing the entire system from the PROPAK<sup>®</sup> boiler\* to the polythermal tubing
- **Corrosion Free System** - completely non-ferrous PROPAK<sup>®</sup> boiler system eliminates the need for costly oxygen barrier tubing
- **Warranty** - 20 year tubing material and labor warranty, the strongest in the industry

*Corrosion Free System - completely non-ferrous system eliminates the need for costly oxygen barrier tubing or water treatment.*

*PROPAK's<sup>®</sup> Snow Melting/De-icing Boiler has been designed specifically for the System. The boiler is equipped with an Air-X-Tank, with top fill, sight gauge; circulating pump, pressure relief valve; modulating gas valve; and all other controls necessary for efficient system operation.*

**PROPAK<sup>®</sup> Snow Melting and De-icing systems can be installed in many types of surfaces including:**

- Brick      - Grass      - Concrete

**\*PROPAK<sup>®</sup> can also be used with other boiler and fuel types**

*With Propak We Can:*

1. Increase Our Winter Business
  2. Reduce The Possibility of Injury & Lawsuits
  3. Eliminate the Cost of Manual Labor
  4. Keep Floors & Carpets Clean in The Winter
- Pay for Itself Within a Few Years
